Setting Procedure

This document helps you to integrate Cacoo Enterprise and Cacoo (Online service, <https://cacoo.com/>) to import the diagrams you have created online. First, please register Cacoo Enterprise as an application. Then the registration information will be used as a setup file for Cacoo Enterprise.

Note: About the account used for the set up

To avoid losing sig-in information in case of the resigning or transferring of the person in charge, we recommend you to use a designated account for registering enterprise as an application.

Note: About [CACOO_URL]

When the settings value shows [CACOO_URL], please replace it with your Cacoo Enterprise's URL.

Example of [CACOO_URL] :

`http://cacoo.example.com/`

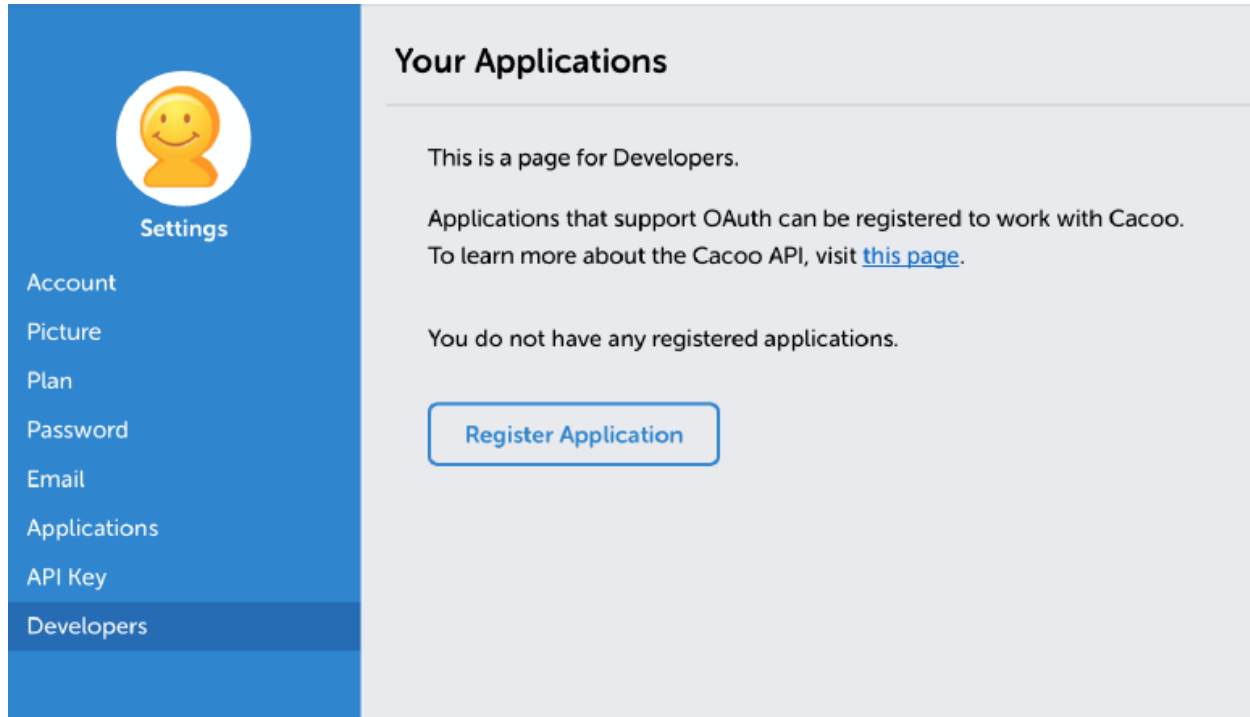

`https://cacoo.example.com:8080/cacoo/`

Register Cacoo Enterprise as an application

On a Web browser, sign in to Cacoo (<https://cacoo.com>) with the designated account for set up. Please access the URL below:

<https://cacoo.com/profile/apps>

Please click “Register Application” in the page. (If you already have registered applications, the list is shown here.)

The screenshot shows the 'Your Applications' page in the Cacoo interface. On the left is a blue sidebar with a user profile icon and a list of settings: Settings, Account, Picture, Plan, Password, Email, Applications, API Key, and Developers (which is highlighted). The main content area is titled 'Your Applications' and contains the following text: 'This is a page for Developers.', 'Applications that support OAuth can be registered to work with Cacoo. To learn more about the Cacoo API, visit [this page](#).', and 'You do not have any registered applications.' At the bottom of this section is a blue button labeled 'Register Application'.

The application's settings page will be shown. Please put the followings.

Application name	Cacoo Enerprise
Description	(blank)
Application's URL	[CACOO_URL]
Organization	Your company name
Application type	Choose “Browser”
Callback URL	[CACOO_URL]signin/cacoocom/callback
Default Access Type	Choose “Read-only”
Icon	(optional)

Click {Register} after the set up.

Edit[Delete Application](#)

That's all for the settings on <https://cacoo.com> . We will move on to the Enterprise.

Update the Cacoo Enterprise's settings

Please update .env file for Cacoo's setting with Consumer Key/Secret which you kept before.

- CACOO_COM_CONSUMER_KEY
- CACOO_COM_CONSUMER_SECRET

Note: About updating the settings file

To update the settings file, Cacoo needs to be restarted.

Everything is set.

Importing diagrams

Each user can import diagrams in the Cacoo (Online service, <https://cacoo.com/>) . Go to Settings > Import to import diagrams.
